Experience

2025 – currentl

Gurucrafts agency

fullstack software developer

As a full-stack software developer, I build complete digital systems from the ground up. I create smooth, friendly interfaces for users and strong, reliable features behind the scenes. My tasks include planning features, writing clean code, connecting apps to databases, testing for quality, fixing issues, and making sure everything runs fast and safely.

Education

Feb 2025- May 2025

Power Learn Project

Certificate in software development

I learned a lot in PLP Africa as a software developer, specializing in Flutter with Dart.

2023 - 2025

Meru Natiinal Polytechnic

Diploma in computer science

I learned and gained a lot studying computer science at Meru National Polytechnic.

2019 - 2022

Muthangene secondary school

High school certificate

During my time at school, I matured and identified my career path. As the timekeeper, I improved my organizational skills and learned punctuality, shaping my career choice. The supportive environment and diverse opportunities helped me grow and solidify my future goals.

2010 - 2018

St Nicholas primary school

Primary school certificate

Attending St. Nicholas Primary School profoundly shaped my life through inspiring teachers, a supportive environment, and strong friendships, fostering my passion for learning, critical thinking, and collaboration, which laid the foundation for my personal and academic growth.
